### Global Positioning System (GPS) navigation-based Tools

Definition (provided courtesy of Garmin's Web site): The Global Positioning System (GPS) is a satellite-based navigation system made up of a network of 24 satellites placed into orbit by the U.S. Department of Defense. GPS was originally intended for military applications, but in the 1980s, the government made the system available for civilian use. GPS works in any weather conditions, anywhere in the world, 24 hours a day. There are no subscription fees or setup charges to use GPS.

#### Garmin Web Site

[Garmin](#) is a leader in Global Positioning System (GPS) technology and an innovator in consumer electronics. Garmin serves both the aviation and consumer markets, and their products are used in flying, boating, driving, hiking and many other activities.

#### LinksPoint Web Site

The [LinksPoint](#) Web site's 'Company Overview' writeup states, "LinksPoint provides Location Powered Solutions™ built around three enabling technologies - Global Positioning System (GPS), Geographic Information Systems (GIS) and Mobile Computing. LinksPoint helps enterprises work more efficiently with solutions for vehicle tracking, navigation and field data collection. LinksPoint's products are used by transportation companies, utilities and government agencies. LinksPoint technology was used by the FDNY at Ground Zero, an application that won the 2002 Exemplary System in Government Award from the Urban and Regional Information System Association (URISA)."

### Business Intelligence Analytical Tools

Provided here are just two Web sites that you may wish to visit regarding Business Intelligence Analytical Tools.

#### Neural Networks at Your Fingertips Web Site

[Karsten Kutza's Web site](#) has the following introduction: "Every newcomer to the field of artificial neural networks, who wants to build own applications based on own software simulators, faces two major problems: turning the theory of a particular network model into the design for a simulator implementation can be a challenging task, and often it is not obvious how to embed an application into a particular network model. The programs on this site deal with both these issues. You will find: ready-to-reuse software simulators for eight of the most popular neural network architectures, coded in portable, self-contained ANSI C, with complete example applications from a variety of well-known application domains."

#### Scarcel deas, LLC Web Site

Moreover, do you need to find that "needle-in-the-haystack" professional organization that possesses not only the requisite knowledge to formulate solutions tailored to your needs but also makes use of its own unique set of analytical tools that will solve such problems in a timely and cost-effective fashion?
