Scsi's Working Definition of Universal Web Accessibility and Web Usability = "World Class Level" Web Sites

"Anyone, anywhere, using any Internet-enabled device, any operating system, and any (Web- or text mode-based) browser should be enabled -- by the Web site personnel's [adherence to judicious design principles](#) and [Best Practices](#) -- to accomplish basic tasks, including the following:

- [Readily access any Web page](#) within the Web site's domain
- [Easily navigate](#) (regardless of the navigation tool chosen, e.g., keyboard, mouse, or other pointing device) within and among its Web pages
- [Display any Web page's contents](#) without imposing any restrictions on the user as to screen resolution or [viewing window size](#)."

All of these [benefits](#) are manifested throughout the always-and-ever [productivity-focused](#) sonoffconsulting.com domain.

Scsi's P&KT Web site is clearly focused on serving as an exemplary working model that clearly and convincingly demonstrates what "[The Ubiquitous Web Domain](#)" describes as a goal to strive to reach.

Hopefully, you will end up agreeing that Scsi has carried this Web site development effort to the point of achieving at least a first-pass Ubiquitous Web Access solution that is available here and now, is based on existing mature technologies, employs a from-the-ground-up Web standards-based design architecture and relevant methodologies, and retains an emphasis on simplicity over complexity at all times.
